NOTICE TO THE PUBLIC

NOTICE IS HEREBY GIVEN that pursuant to Sections 29-125, 9-6.4 and 9-6.6 of the Code of Virginia, the Commission of Game and Inland Fisheries, meeting at Richmond, Virginia, on October 19 and 20, 1956, ordered the following proposed changes in its rules and will hold a Public Hearing for the purpose of adopting these rules at Room 100, 7 North Second Street, Richmond, Virginia, Friday, November 30, 1956 at 9:30 A. M. Copy of said proposed rules have been filed with the Division of Statutory Research and Drafting.

(a) That Regulation No. 42 be amended to read as follows:

The statewide open angling season for trout be from 12 o'clock noon April 13, 1957, to one hour after sunset September 15, 1957, Eastern Standard Time, and from one hour before sunrise to one hour after sunset on intervening days. The daily creel limit shall be eight.

(b) That Regulation No. 40 be amended to read as follows:

The season for taking wall-eyed or pike perch, east and west of the Blue Ridge Mountains shall conform to the season for taking bass. The creel limit for taking wall-eyed or pike perch be 8 a day in the aggregate.

(c) That chain pickerel or jackfish be declared a game fish, the season for taking the same and daily creel limit to conform to that for taking bass.

(d) That it shall be lawful statewide, to use trot lines or set poles using bait, except minnows (dead or alive), for the taking of turtles.

(e) That it shall be unlawful to use hedging in connection with dip nets, in the public inland streams.

Science Increases Man's Efficiency

Step by step science is increasing man's efficiency. Agricultural economists at VPI point out, for instance, that: it requires 22 per cent less feed to produce a quart of milk than it did 40 years ago; 23 per cent less feed to produce a dozen eggs; 29 per cent less feed to produce a pound of chicken, and 32 per cent less feed to produce a pound of pork. Through the application of science in engineering and agriculture, average corn production has gone from 26 to over 38 bushels per acre during the past 40 years, but the man-hours needed to produce 100 bushels of corn has dropped from 135 to 34. During the same time the man-hours needed to grow an acre of wheat has dropped from 15.2 to 4.4 hours. A ton of hay required 10.3 hours of labor compared to 4.6 hours today.

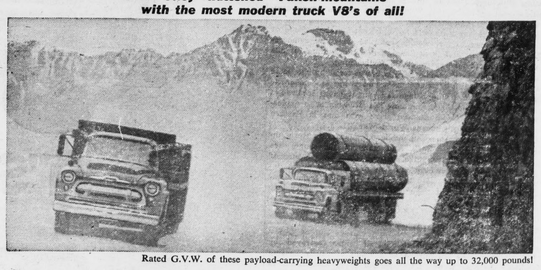
New Task-Force 57 Chevrolet Trucks!
They "flattened" Yukon mountains with the most modern truck V8's of all!



Rated G.V.W. of these payload-carrying heavyweights goes all the way up to 32,000 pounds!

New V8-powered '57 Chevrolet trucks, heavily loaded, made one of the world's toughest roads look easy! In a straight-through test run, they rolled over the famous ALCAN Highway to Alaska—in less than 45 hours (normally a 72-hour run). Here's proof-in-action of power that'll handle your toughest jobs—and keep coming back for more!

Whatever your job, there's an Alcan-proved Chevrolet Task-Force truck ready right now to save you time and money!

Six new Task-Force huskies made the run. And six ultra-modern Chevy engines proved their power and performance—with gas mileage up to 18.17 miles per gallon! Two of the engines were not stopped once, and they hummed along at peak efficiency the entire 1,520 miles!

Chevy's big V8's—including the new 283-cu.-in. Super Taskmaster—turned in top performance jobs. They hauled typical loads up and down towering grades and through washouts that sucked wheels into hub-deep mud. They roared on through miles of heavy dust that narrowed visibility to a few hundred feet. And in spite of the varying altitudes and temperatures, not a single truck was forced to drop out or turn back! Stop by and see them soon!

Alcan run supervised, certified by the AAA.

Proved on the Alcan Highway
Champs of every weight class!
